Side screens

Extra security features to protect against burglary and vandalism. Certified according to EN 1627, resistance class RC2.

ASSA ABLOY SL500 Protect

The system consists of doors with slim line aluminium profiles, operator, safety units and, if required, side screens.

Available for beam- or wall mounting and supplied as biparting or single-sliding, all models can be tailored to individual customer requirements, suitable for entrances with high security demands.

Security features

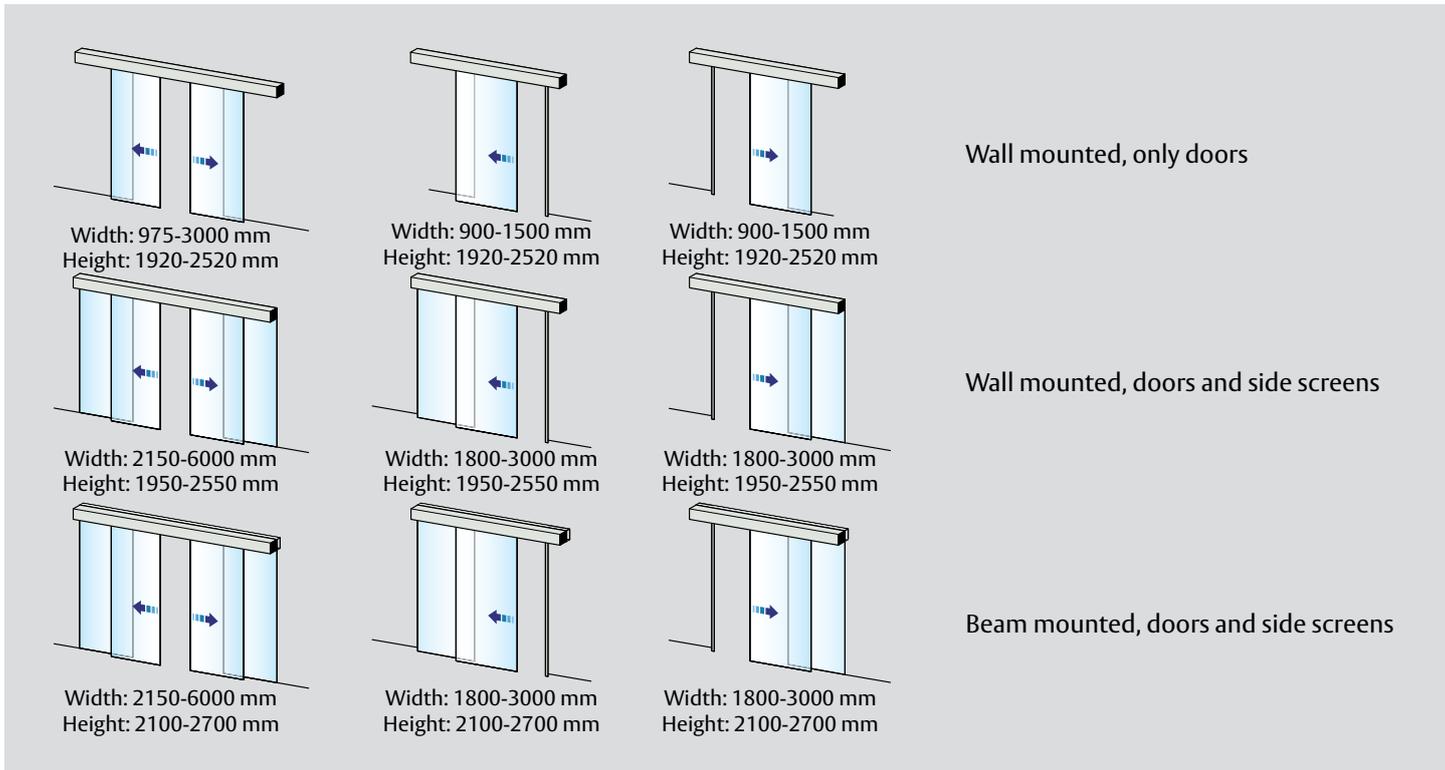

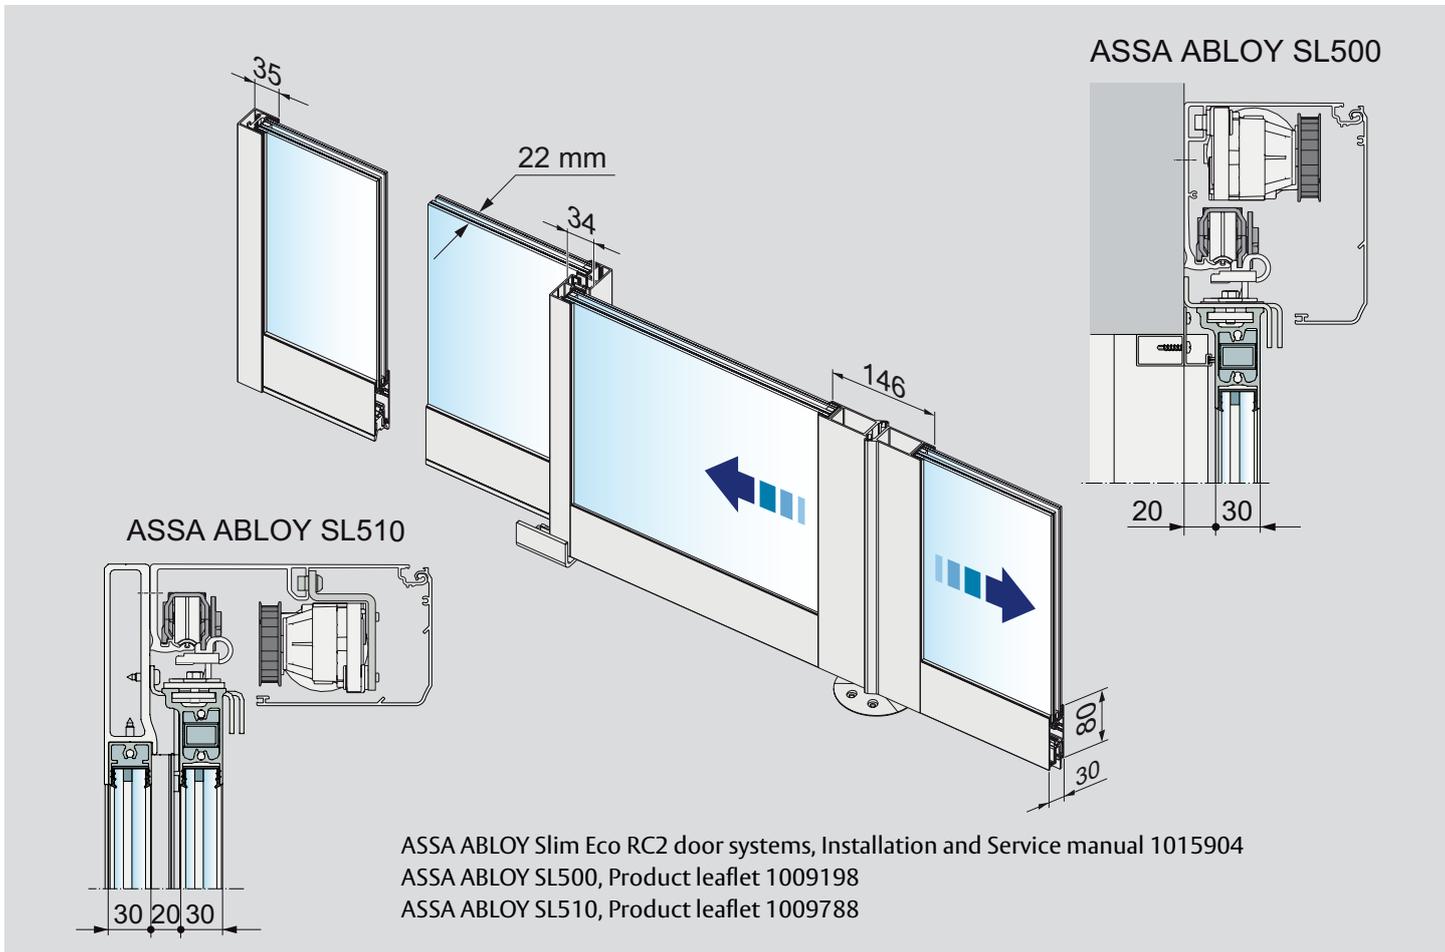

The door system is certified and tested according to EN 1627 for resistance class 2. The system is equipped with P4A glass, which is a laminated security glass according to demand in EN 1627. The doors are secured with two mechanical locks that are housed in a new leading edge profile, that is specifically developed for this system. The locks are certified SKG★★(SKG 2 stars). The system is equipped with an electromechanical lock in the operator. Extended interlock support through the trailing edge, floor and the top.

Safety features

An integrated activation and presence detection system enhances safety for users by detecting people or objects in the doorway, preventing the door from closing until it is safe to do so.

Sustainability

ASSA ABLOY's automatic door systems can reduce the amount of energy needed to heat or cool a building, resulting in lower costs and a smaller carbon footprint for customers. The ASSA ABLOY SL500 Protect is equipped with extra tight-fitting brushes (TightSeal). It can also be equipped with additional sensors for fine-tuning opening and closing times, further enhancing its energy-saving capabilities. Regular maintenance helps insure top performance and extends the life of the equipment, reducing its impact on the environment.

This equipment should be installed, regularly inspected, maintained and serviced by trained and authorized personnel. Preventive maintenance plans are highly recommended for a proper and safe operation. Talk to your ASSA ABLOY Entrance Systems representative to learn more about our service offering!
